Hon'ble Prime Minister of India

New Delhi

**Subject: Suggestions for promoting Digital India Programme.**

Digital India is a welcome step to develop a transparent economy and attack on corruption and black money.

To promote the Digital India programme, it would be better if the following three aspects are taken care of:-

- A. The withdrawal or reduction of service charge or convenience fees on cards or digital payments currently imposed by various government departments and organisations. Like in online railway ticket bookings etc.
- B. Effective widespread participation of rural as well as urban population, this require fastest Internet connectivity at lower tariff and educating and imparting the basic computer knowledge to households.
- C. The Cyber security is another important measure to promote the confidence amongst the general public for use of e-services over cyber space. With the efficient and effective surveillance and equally effective implementation of the cyber security measures, the usage can be increased.

Wishing a great success for the 'DIGITAL INDIA' programme.

Yours Faithfully

CA. Rajendra Goyal
